MAHAD TAHIR

Lahore, Punjab, Pakistan | mahadbuilds289@gmail.com | 0322-5493838 | github.com/mahad-builds

OBJECTIVE

Intermediate (ICS - Physics) student with hands-on experience building and shipping full-stack SaaS tools, automation workflows, and networking labs. CCNA-level networking trained, with a strong interest in cybersecurity and automation. Seeking an internship or entry-level opportunity to apply and grow practical technical skills in a real-world environment.

PROJECTS

Webhook Proxy — Webhook Relay & Retry SaaS (Live)

Next.js, Supabase (PostgreSQL), Prisma, Clerk Authentication

- Built and deployed a production SaaS tool that sits between webhook sources (Stripe, Make, Zapier) and destination servers, logging every payload and automatically retrying failed deliveries.
- Designed a backoff retry system (1m / 5m / 15m) with manual retry, full audit logging, and a dashboard with real-time status updates.
- Resolved 16+ bugs through a self-driven audit covering data redaction, validation, pagination, and transaction safety; shipped a public landing page and documentation.

TeamAutomation — Slack Approval Automation

Slack API, Supabase (Row-Level Security)

- Built a Slack-native approval workflow tool letting teams approve or reject requests directly from interactive Slack messages.
- Implemented automated reminder nudges, one-click approval delegation, and a fully exportable audit trail.

AuditReady — Compliance & Vulnerability Scanner (In Progress)

Automated Security Scanning, SOC 2 Mapping

- Developing a tool that scans a domain for security vulnerabilities and maps findings to SOC 2 Trust Service Criteria (CC6, CC7, A1, C1).
- Building automated, auditor-ready PDF reports with a 0-100 security scoring system for startups preparing for compliance audits.

Workflow Automation (n8n & Make.com)

- Built several self-directed automation workflows using n8n and Make.com, connecting APIs and services to automate repetitive tasks.

CCNA Networking Labs

- Designed and verified networking labs in Cisco Packet Tracer covering OSPF single-area routing, VLANs with inter-VLAN routing, extended ACLs, and port security.

SKILLS

- Technical: Next.js, JavaScript/TypeScript, Supabase, Prisma, Git/GitHub, Vercel, REST APIs
- Automation: n8n, Make.com, Workflow design
- Networking & Security: CCNA-level networking (OSPF, VLANs, ACLs, Port Security), Cisco Packet Tracer, Cybersecurity fundamentals
- General: Strong computer & laptop proficiency, self-directed learning, problem solving

CERTIFICATIONS & TRAINING

- CCNA Networking — Training Course Completed, Corvit Systems

EDUCATION

Intermediate (ICS — Physics) — In Progress, 1st Year

Matriculation — Completed
